- Colored surfaces open until only darkness remains

- Bottom surface appears; its opacity decreases.
- Cage moves to the center; opacity increases.

- At the same time, two silhouettes move into the center and reappear into the cage.

- A bulb appears in the darkness then disappears.

- Surfaces move and disappear.
- Figure slowly appears (opacity change).

- Cage moves into an empty space in which figure becomes more and more visible.

- At some point, cage disappears and only the figure is visible in the empty space.
